

# Fusion

## Description

Fusion is an international award winning product design that incorporates unique user modes. It can be used flat on text and effortlessly glides over text on its discrete rollers. The clam shell designed screen can be tilted at the optimum angle for user comfort. When required, the integrated mouse can then be removed and used to access awkward reading areas like the spines of books or files. The patented overview mode can then be employed to deliver a range of lower magnifications and near distance viewing when required. The Fusion will deliver over 4.5 Hrs continuous use on the move.

## Features & Specifications

- Mag 6.5 to 15X continuous optical on mouse.
- Overview mode for large field of view (2 X and above)
- Modes FC, P& N And user selectable ink and paper colours
- 7" TFT LCD
- Weight: 1.1 kg (2lb 4oz)
